

SUMMARY

Detail-oriented and talented professional, with a passion and strong affinity for software engineering, development, programming, and technological innovation, exceptional business analysis, communication skills and problem-solving; offering experience in IT and business solutions.

PROFILE

- Strong knowledge in C# and ASP.NET with a capable base in object-oriented programming.
- Expertise in full Software Development Life Cycle (SDLC) and sound knowledge of globally-supported front-end and back-end frameworks.
- Experience in creating web and enterprise application projects from initial specifications down to final rollout and maintenance leveraging a wide range of technologies including C#, .Net, SQL, JavaScript, CSS, Bootstrap, HTML.
- Good knowledge and understanding of code programming principles and computer science problems.
- Ability to understand and transform complex business requirements into software, ensuring applications are delivered on time, to specification, are scalable, performance-optimized, and maintainable.
- Unique blend of technical expertise, business management background and finances understanding.
- Excellent organizational, time management, and interpersonal skills.
- Experienced communication skills both written and oral and ability to work well independently and with a team.
- Highly motivated and excited to learn new things to extend knowledge and get more exposure to the software development field.

PROJECTS

- Built various projects using .NET, C#, JavaScript, CSS, HTML applied a code-first approach.
- Attended local programming study group/workshop www.HappyArray.org - ASP.Net MVC, C#, MS SQL, Postgres SQL, HTML, CSS, JavaScript where worked with team of developers on building and testing.
- Worked in team to update SaaS ticketing system for managing IT projects and issuing tickets for further review by using GIT for version control, creating pull requests to review, changing and merging code, and resolving conflicts.
[www.Bitbucket \(Thebugtracker\)](http://www.Bitbucket(Thebugtracker))
- Built web app with .NET and C-Sharp using MS SQL based on a CODE-FIRST approach, following MVC and repository design patterns; implementing role-based security, and data validation on both back and front end.
- Improved TheBugTracker web application by creating a mail service page with pagination and sorting.
- Added global error handling for web app showing custom-designed page and user-friendly message while allowing for technical error information to be accessed.
- Refactored application by implementing repository design patterns to make code more testable and facilitate automated unit testing.

SKILLS

- | | | |
|----------------|-------------------------------|----------------------------|
| • C# | • Entity Framework | • My SQL Server |
| • OOP | • JavaScript | • Postgres SQL |
| • ASP.NET.Core | • Cascading Style Sheet (CSS) | • SQL |
| • MVC | • Bootstrap | • Git / GitHub / Bitbucket |
| • SOLID | • HTML5 | • Trello |

WORK EXPERIENCE

- eCommerce Business | Warminster, PA 2014 - present
- Created and run an online store on ecommerce business platform by performing online sales and services.
 - Provided excellent customer service and clear communications.

EDUCATION

- C# Development Course | HTML, CSS and JavaScript Course | IT-Academy 2021 - present
- SQL Course | W3SCHOOL / Sololearn
- Bachelor's Degree in Economics and Management | Institute of Modern Knowledge, Minsk, Belarus
